### TV Shows vs. Movies: A Visual Comparison

Movies are enjoyed by audiences more than twice as often as TV shows, highlighting their popularity in the realm of entertainment.

# 3a. Find the number of movies produced in each country and pick the top 10 countries

In [43]:	m	novie_data.group	oy('coı
Out[43]:		country	title
	0	United States	2751
	1	India	961
	2	United Kingdom	534
	3	Canada	319
	4	France	303
	5	Germany	182
	6	Spain	171
	7	Japan	119
	8	China	114
	9	Mexico	111

#### Observations **?**

United States stands in the first place in producing netflix movies with a count of '2364' and next stands India with a movie count of '962'.

# 3b. Find the number of TV-shows Produced in Each Country and pick the top 10 countries.

```
In [44]: tv_data.groupby('country')['title'].nunique().drop('Unknown').sort_values(ascend
```

	country	title
0	United States	938
1	United Kingdom	272
2	Japan	199
3	South Korea	170
4	Canada	126
5	France	90
6	India	84
7	Taiwan	70
8	Australia	66
9	Spain	61

Out[44]:

#### Observations **?**

United States stands in the first place in producing netflix Tv-shows with a count of '938' and next stands India with a movie count of '272'.

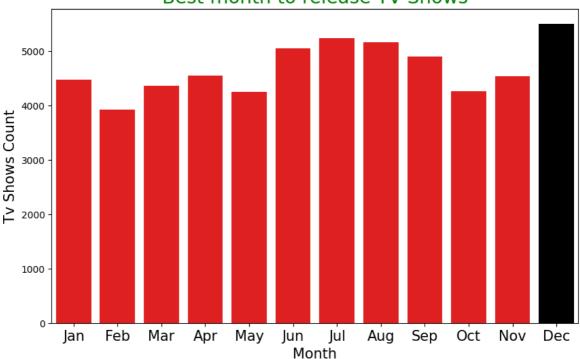

## 4. What is the best time to launch a TV show?

#### **Month Wise**

```
In [45]: # TV Shows grouping by Month
    tv_data_monthGroup = tv_data.groupby('month_added')['show_id'].apply(lambda x :
        month_dict = {'Jan':1,'Feb':2,'Mar':3, 'Apr':4, 'May':5, 'Jun':6, 'Jul':7, 'Aug'

    plt.xticks(fontsize = 8)
    plt.title("Best month to release TV Shows",fontsize=20, color = 'green')</pre>
```

Out[52]: Text(0.5, 1.0, 'Best month to release TV Shows')

#### Best month to release TV Shows

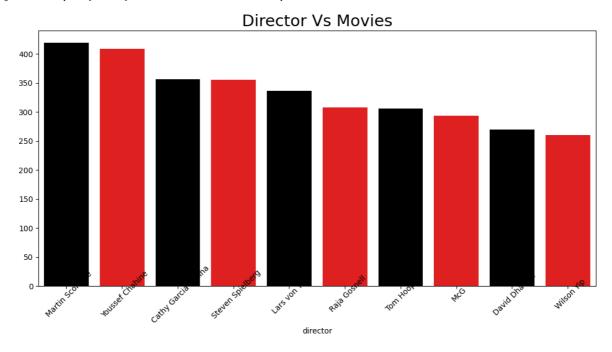

#### Observations **?**

- 1. Data shows that 27th week is the best week to produce TV shows on netflix
- 2. 1st week is the best week to release Movies.

## 5. Analysis of actors/directors of Different Types of Shows / Movies.

```
In [53]: movie_dir = movie_data.groupby('director')['show_id'].count().drop('Unknown').so
    movie_cast = movie_data.groupby('cast')['show_id'].count().drop('Unknown').sort_
    tv_dir = tv_data.groupby('director')['show_id'].count().drop('Unknown').sort_val
    tv_cast = tv_data.groupby('cast')['show_id'].count().drop('Unknown').sort_values
In [54]: plt.figure(figsize=(13, 6))
    sns.barplot(x= movie_dir.index, y = movie_dir.values, palette= netflix_color_pal
    plt.xticks(rotation=45, wrap=True)
    plt.title('Director Vs Movies', fontsize=21)
```

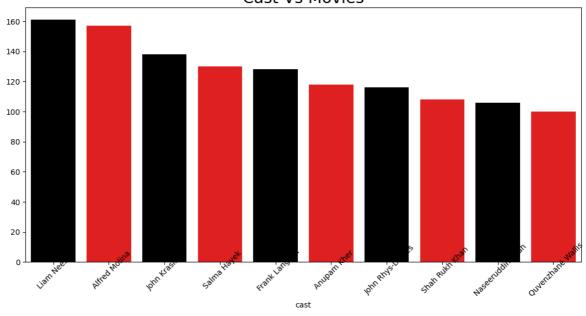

Out[54]: Text(0.5, 1.0, 'Director Vs Movies')

```
In [55]: plt.figure(figsize=(13, 6))
    sns.barplot(x= movie_cast.index, y = movie_cast.values, palette= netflix_color_p
    plt.xticks(rotation=45, wrap=True)
    plt.title('Cast Vs Movies', fontsize=21)
```

Out[55]: Text(0.5, 1.0, 'Cast Vs Movies')

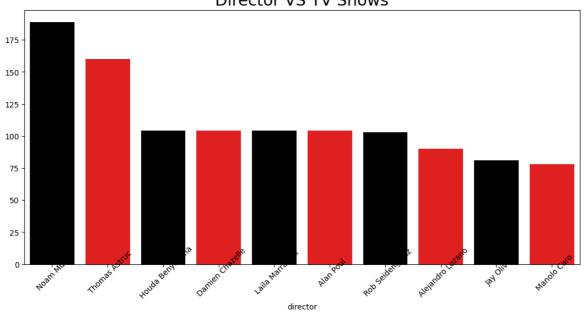

#### Cast Vs Movies

In [56]: plt.figure(figsize=(13, 6))
 sns.barplot(x= tv\_dir.index, y = tv\_dir.values, palette= netflix\_color\_palette)
 plt.xticks(rotation=45, wrap=True)
 plt.title('Director VS TV Shows', fontsize=21)

Out[56]: Text(0.5, 1.0, 'Director VS TV Shows')

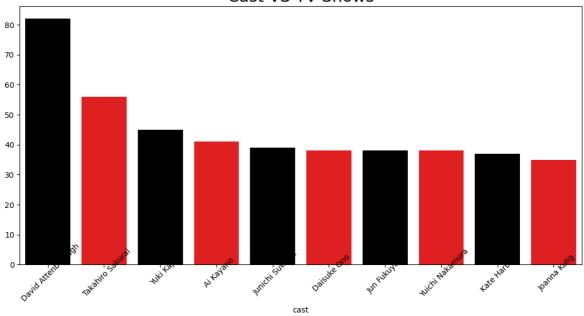

#### **Director VS TV Shows**

```
In [57]: plt.figure(figsize=(13, 6))
    sns.barplot(x= tv_cast.index, y = tv_cast.values, palette= netflix_color_palette
    plt.xticks(rotation=45, wrap=True)
    plt.title('Cast VS TV Shows', fontsize=21)
```

Out[57]: Text(0.5, 1.0, 'Cast VS TV Shows')

#### Observations **?**

From the above plots it is known that:

- 1. Best director for movies is 'Martin Scorsense'
- 2. Best actor for movies is 'Liam Neeson'
- 3. Best director for tv shows is 'Noam Murro'
- 4. Best actor for tv shows is 'David Attenborough

## 6. Which Genre movies are More Popular or Produced more

```
In [58]: plt.figure(figsize=(25,15))
  text = str(list(df['listed_in'])).replace(',', '').replace('[', '').replace("'",
```

```
# word cloud image
wordcloud = WordCloud(stopwords=STOPWORDS, max_words=100, background_color='whit

plt.imshow(wordcloud)
plt.axis('off')
plt.savefig('country.png')
plt.show()
```

```
Hovies Classic Volt Movies Dramas TV Movies Sci Movies Dramas TV Movies Crime TV Sports Movies Anime Series Movies Dramas TV Movies Crime TV Sports Movies Anime Series Movies Dramas Action TV Shows Spanish Movies Children Act To Movies Partial Adventure Comedies Comedies Comedies Independent Movies Music Movies Independent Movies Independent Movies Independent Movies Independent Movies Independent Movies Independent Movies Music Music
```

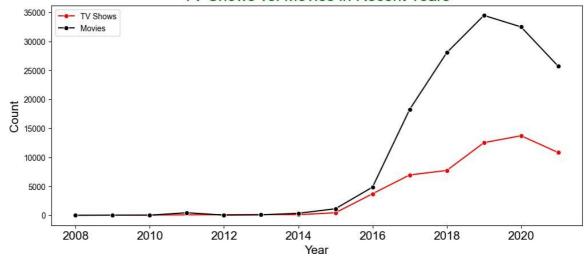

#### Observations **?**

From the above word cloud, "International movies" are produced more on netflix and next to it will be TV shows

## 7. Does Netflix has More Focus on TV Shows than Movies in recent years

```
In [59]: grpd_tv_data = tv_data.groupby('year_added')['show_id'].count().reset_index()
    grpd_movie_data = movie_data.groupby('year_added')['show_id'].count().reset_inde
    plt.figure(figsize=(12,5))
    sns.lineplot(x = grpd_tv_data.year_added , y = grpd_tv_data.show_id, color='red'
    sns.lineplot(x = grpd_movie_data.year_added , y = grpd_movie_data.show_id, color
    sns.set_theme(style='white')
    plt.xlabel('Year', fontsize= 15, color = 'black')
    plt.ylabel('Count',fontsize= 15, color = 'black')
    plt.xticks(fontsize = 15)
    plt.title("TV Shows vs. Movies in Recent Years",fontsize=20, color ='green')
    plt.show()
```

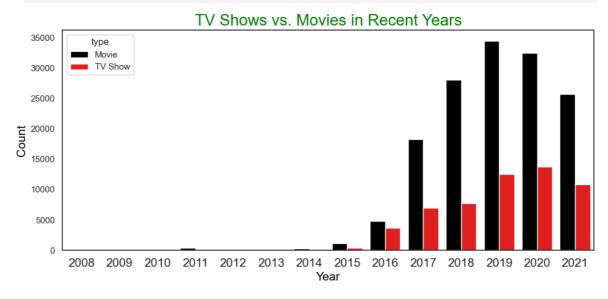

#### TV Shows vs. Movies in Recent Years

#### Observations **9**

The above line plot shows a parallel Growth of TV Shows and Movies Until 2016, followed by exponential movie expansion.

```
In [60]: grpd_data = df.groupby(['year_added','type'])['show_id'].count().reset_index()
    plt.figure(figsize=(12,5))
    cols = sns.color_palette(['black','red'])
    sns.barplot(x = grpd_data.year_added , y = grpd_data.show_id, hue=
    grpd_data.type, palette = cols )
    sns.set_theme(style='white')
    plt.xlabel('Year', fontsize= 15, color = 'black')
    plt.ylabel('Count',fontsize= 15, color = 'black')
    plt.xticks(fontsize = 15)
    plt.title("TV Shows vs. Movies in Recent Years",fontsize=20, color ='green')
    plt.show()
```

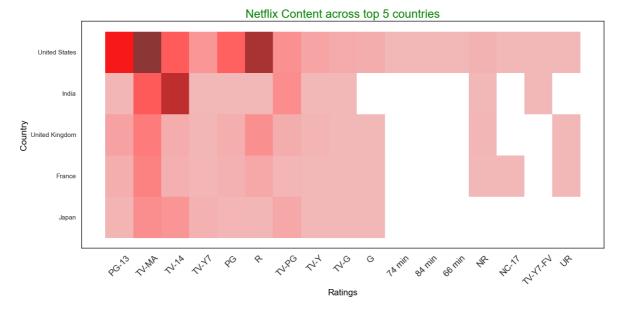

#### Observations **?**

1. The Movie Boom (2016-2019): Between 2016 and 2019, the movie industry witnessed an exponential upswing.

- 2. Consistent TV Shows: TV shows, on the other hand, held their ground with a steady pace.
- 3. The Decline of Movies (Post-2019): The drop in movie production after 2019 raises intriguing questions like Market Saturation, Return on Investment et

## 8. Understanding What Content is available in Different Countries

```
In [61]: # Getting top 5 countries with content on netflix
top_countries =list(df.country.value_counts().drop('Unknown')[:5].index)
plt.figure(figsize=(16,7))
sns.histplot(data=
df[df['country'].isin(top_countries)], x="rating", y= 'country', color = 'red')
sns.set_theme(style='dark')
plt.xlabel('Ratings', fontsize= 15, color = 'black')
plt.ylabel('Country',fontsize= 15, color = 'black')
plt.ylabel('Country',fontsize= 15, color = 'black')
plt.xticks(rotation = 45, fontsize = 15)
plt.title("Netflix Content across top 5 countries",fontsize=20, color = 'green')
plt.show()
```

#### Observations **?**

The above heatmap shows the ratings across top 5 countries. Netflix content with rating 'TV-MA' is mostly avaible in United States

Where as 'TV-14' is the top availabe rated content in India. India has no G, NC-17, UR content availabe where as Japan has no NR, NC-17, TV-Y7-FV and UR rated content availabe

### 9. Find After how many days the content will be added to Netflix after the release of the movie

```
In [62]: df['days_to_add']=df['date_added']-df['release_year']
    df['days_to_add'].mode()[0]
```

#### Observations **?**

An average of 547 days are taken to add a movie or a tv show to netflix after its relase. (Considering each show or movie is released on jan 1 of the respective release year as the exact date of release is not availabe.
